

November 2013 Release Notes

The following changes were released to the live system during November 2013. Please review the below release notes carefully as some changes impact the way the system works. If you have any questions or need clarification on any of the changes, please contact support at 416-961-7884, option 2, or email us at contact@condocontrolcentral.com.

Related Feature	Change Type	Ref #	Release Notes
Amenity Booking			
	Customer Request	DEV-470	To avoid confusion, we have revised the amenity booking notice sent out when an amenity booking is revised.
	Customer Request	DEV-506	Amenity bookings can now have pre-defined time slots. For example, if you only allow elevator bookings from 9-12 or 1-4, these time slots can be configured so they are selected during the booking process, rather than having to manually enter the start and end times. To enable this feature, contact Condo Control Central Support.
	Customer Request	DEV-511	Amenities can now be configured to display users options when booking. E.g., for booking an elevator, you can require that they select from "Move In", "Move Out", "Delivery", etc. These various options may also impact pricing. For example, booking a guest suite without linens may be cheaper than booking with full linen service. To enable this feature, please contact Condo Control Central support.
Entire System			
	Bug Fix	DEV-529	There were a number of places in the system where messages or tables were not formatted as cleanly as they should be. We have made formatting improvements to these areas to make sure all features are clear and easy to use.
Security & Concierge			
	Bug Fix	DEV-525	After the one thousandth PDF parking permit is generated with the same file name, Windows is not able to rename it to avoid duplicates. As a result security guards were not able to access the permit. To correct this, parking permits are now generated with unique file names.
	Customer Request	DEV-520	Owners and residents can now register and print their own parking permits online. To turn this feature on, please contact Condo Control Central.
	Customer Request	DEV-494	Based on customer feedback, we've changed the system to allow property managers to view security logs without first being required to create a shift.
	Customer Request	DEV-516	Based on customer feedback we have made a change to the new visitor screen. When a new visitor is logged, security guards can now easily view the contact information for the person being visited. This will save time for security guards when a new visitor arrives on site.

November 2013 Release Notes

The following changes were released to the live system during November 2013. Please review the below release notes carefully as some changes impact the way the system works. If you have any questions or need clarification on any of the changes, please contact support at 416-961-7884, option 2, or email us at contact@condocontrolcentral.com.

Related Feature	Change Type	Ref #	Release Notes
	Customer Request	DEV-519	Based on customer feedback, we have made changes to permissions for security guards. The new changes allow administrators more control; they control which groups can view vs. edit the unit file, and they can allow security guards to view amenity booking details, but not edit or make changes.
Unit File			
	Customer Request	DEV-461	Based on customer feedback, we have added an option to hide the buzzer code features in the system if they are not required for a particular building.
	Customer Request	DEV-487	We've added a "Notes" section to the Unit File, which can be used to store various free-form notes, which can be organized by category. You can also define the categories however you like.
